# suicide to Hope

*aiding recovery and growth*

The Canadian Mental Health Association/PEI Division (CMHA/PEI) is hosting a **'suicide to Hope' (s2H)** Workshop.

**'suicide to Hope: A Recovery and Growth Workshop'** is a one-day workshop designed for clinicians and other professional caregivers who work with persons recently at risk and currently safe from suicide. This work is on a longer-term basis and beyond the suicide first-aid emergency situation. s2H provides tools to help caregivers and persons with experiences of suicide to work together to develop achievable and significant recovery and growth goals.

**suicide to Hope (s2H)** assumes that participants already have some familiarity with suicide prevention and intervention techniques. LivingWorks' two-day ASIST workshop is recommended as one way to learn the suicide intervention skills that are necessary for using suicide to Hope's tools. The skills learned in the suicide to Hope workshop are designed to complement this existing knowledge and experience, and are applicable to caregivers in a wide variety of professional disciplines.

In preparation for s2H, participants will be asked to complete 2-3 hours of pre-reading – a link will be sent out prior to the workshop. Upon completion of s2H, participants receive a certificate for 8 accredited hours of suicide prevention training.
